ABSTRACT OF THE DISCLOSURE

A new and distinct cultivar of an *Anthurium andreanum* plant named

'Anthbnem', as described and illustrated, and particular characterized by the combined

features of compact plant growth and early and very rich flowering; mini-type pot

plant, maximum growth to an average of 40 cm; long and erect peduncle, flowers held

well above the foliage; full plant habit due to shoot formation, lush plant due to straight

but flexible flower and leaf petioles; dark green leaves, compact, durable with light

green primary veins; red and very durable flowers, lastingness of the inflorescence up

to one year; and large amount of flowers in relation to the amount of leaves, resulting in
an excellent leaf to flower size ratio.
